Comments/recommendations
to the Board of Directors

Continue to aim for approximately 10 people on this committee, emphasizing the need for active participation that requires pre-work before meetings and regular attendance at the monthly meetings.

Consider whether you want to develop additional criteria for participation on the legislation committee. There appears to be a large amount of interest in participating on this committee from the membership, so having criteria would assist in being able to make fair decisions about who should be selected to serve, and help those applying understand the expectations.

Goals for Coming Year:

Continue to support the ANA NY Legislative priorities through active engagement and participation of the Legislative committee.
